

**NOTICE OF FINDING OF NO SIGNIFICANT IMPACT AND
NOTICE OF INTENT TO REQUEST RELEASE OF FUNDS**

March 11, 2026

Mr. Tony Bernard, President, Board of Trumbull County Commissioners
Trumbull County Administration Building, 160 High Street NW, 5th Floor, Warren, Ohio 44481
330-675-2451

To All Interested Agencies, Groups, and Individuals:

These notices shall satisfy two separate but related procedural requirements for activities to be undertaken by the Board of Trumbull County Commissioners.

REQUEST FOR RELEASE OF FUNDS

On or about, but not before, March 27, 2026, the Board of Trumbull County Commissioners will submit a request to the State of Ohio for the release of Federal funds under Section 104 (g) of Title I of the Housing and Community Development Act of 1974, as amended; Section 288 of Title II of the Cranston Gonzales National Affordable Housing Act (NAHA), as amended; and/or Title IV of the Stewart B. McKinney Homeless Assistance Act, as amended; to be used for the following project(s):

Sewer Facilities, Crain Drive Sanitary Sewer Project
Public Facility Improvements, PY2025 CDBG Allocation

Funds will be utilized to pay for construction of approximately 6,596 linear feet of sanitary sewer, 30 pre-cast manholes, 2,089 linear feet of storm sewer removal/replacement, and service lateral connections assistance for LMI owner occupied households.

Multi-Year Project, Weathersfield Township, Environmental Assessment, \$70,693

FINDING OF NO SIGNIFICANT IMPACT

The Board of Trumbull County Commissioners has determined that the project will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under the National Environmental Policy Act of 1969 (NEPA) is not required. Additional project information is contained in the Environmental Review Record (ERR) which is available for review on the Board of Trumbull County Commissioners website at <https://www.co.trumbull.oh.us/Commissioners/Bid-Opportunities> under Public Hearings/Notices, on the Trumbull County Planning Commission website at <https://www.co.trumbull.oh.us/planning/>, and may be examined or copied weekdays M-F between 8 A.M. and 4 P.M, except for legal holidays. at the Trumbull County Planning Commission located at 185 East Market Street, 2nd Floor Suite A, Warren, Ohio 44481. The ERR may also be provided upon request electronically via email. Please submit your request by U.S. mail to Andrew Cvetkovich, Trumbull County Planning Commission, 185 East Market Street, 2nd Floor, Suite A, Warren, Ohio 44481 or by email to Andrew.Cvetkovich@co.trumbull.oh.us

PUBLIC COMMENTS

Any individual, group, or agency may submit written comments on the ERR to the Board of Trumbull County Commissioners by U.S. mail or email at the addresses above. All comments received before March 27, 2026, will be considered by the Board of Trumbull County Commissioners prior to authorizing submission of a request for release of funds. Comments should specify which Notice they are addressing.

ENVIRONMENTAL CERTIFICATION

The Board of Trumbull County Commissioners certifies to the State of Ohio that Tony Bernard in his capacity as President, Board of Trumbull County Commissioners consents to accept the jurisdiction of the Federal Courts if an action is brought to enforce responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. The State of Ohio's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities and allows the Board of Trumbull County Commissioners to use Program funds.

OBJECTIONS TO RELEASE OF FUNDS

The State of Ohio will accept objections to its release of funds and the Board of Trumbull County Commissioners certification for a period of fifteen days following the anticipated submission date or its actual receipt of the request (whichever is later) only if they are on one of the following bases: (a) the certification was not executed by the Certifying Officer of the Board of Trumbull County Commissioners; (b) the Board of Trumbull County Commissioners has omitted a step or failed to make a decision or finding required by HUD regulations at 24 CFR part 58; (c) the grant recipient or other participants in the development process have committed funds, incurred costs or undertaken activities not authorized by 24 CFR Part 58 before approval of a release of funds by the State of Ohio; or (d) another Federal agency acting pursuant to 40 CFR Part 1504 has submitted a written finding that the project is unsatisfactory from the standpoint of environmental quality. Objections must be prepared and submitted in accordance with the required procedures (24 CFR Part 58, Sec. 58.76) and shall be addressed to Ohio Department of Development, Office of Community Development at OCD@development.ohio.gov. Potential objectors should contact the State of Ohio to verify the actual last day of the objection period.

Tony Bernard, President
Board of Trumbull County Commissioners
160 High Street NW, 5th Floor
Warren, Ohio 44481

Environmental Assessment Worksheet

Grantee	Trumbull County
Grant Number	25NR-1CS-25CDBG
Activity Name	The Crain Drive Sanitary Sewer Project
Activity Location	The Crain Drive Sanitary Sewer Project Area is located within Weathersfield Township and is located entirely within Census Tract 9320 Block Group 1
<p>Activity Description:</p> <p>The Crain Drive Project Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. Trumbull County and the City of Niles have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Giard Waste Water Treatment Plant (WWTP).</p> <p>Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through completion. Trumbull County will utilize \$70,693 of the PY2025 CDBG Allocation to complete the Crain Drive Sanitary Sewer Project.</p>	
<p>Determination:</p> <p><input checked="" type="checkbox"/> <u>Finding of No Significant Impact (FONSI)</u>, whereby the Responsible Entity may proceed to Dissemination and publication of the FONSI, per regulations found at 24 CFR Section 58.43(a).</p> <p><input type="checkbox"/> <u>Finding of Significant Impact</u>, whereby the Responsible Entity must proceed to develop an Environmental Impact Statement (EIS) in compliance with 24 CFR Part 58, Subparts F or G.</p>

- 5- Benefited Properties Address List

I. GENERAL BACKGROUND OF PROJECT

This Crain Drive Sanitary Sewer Project is being constructed in response to a 2021 petition submitted by the property owners in the project area. The Trumbull County Sanitary Engineering Department is responsible for the operation and maintenance of publically owned sanitary sewer infrastructure located within the unincorporated area of Trumbull County. The limits of the boundaries of the Crain Drive Project lie within such an unincorporated area. This project includes a collection system to service an estimated 63 structures. The purpose of the project is to eliminate the effluent from failed septic systems and alleviate the existing threat to the health, safety and welfare of the affected residents by constructing a central sanitary sewer collection system (see Exhibit 3).

II. PROJECT DESCRIPTION

The project consists of the construction of a gravity sewer collection system to include 645 linear feet of 18" diameter PVC pipe, 963 linear feet of 15" diameter PVC pipe, 1,003 linear feet of 12" diameter PVC pipe, 3,985 linear feet of 8" diameter PVC pipe, 30 sanitary manholes, a master meter pit and necessary appurtenances thereto. The service area includes the following roads and streets: All of Crain Drive, Forest Avenue, St. Francis Avenue, and Carl Street, portions of Oakwood Street, Bianco Avenue, Anderson Morris Road, Lily Avenue, Wabash Avenue and Mary Lane (see Exhibit 1). The project also includes 63 six-inch diameter service connections within the public right-of-way.

III. EARTH DISTURBANCE

The sewer installation will require earth disturbance activities to include trench excavations. The trench depths for mainline installation will vary from 8 to 18 feet with an average depth of 15 feet. The trench widths for mainline installation will average 5 feet. The trench widths will also be subject to the means and methods of the contractor and the size of the trench box in any particular trench will be the primary factor in determining the actual trench width. The total length of trenches for mainline installation will be approximately 6,596 feet. Trench excavations for manholes will require 7 feet x 7 feet holes and depths averaging 16 feet. A rough estimate of total earth disturbance can be calculated as follows:

Mainline:	6,596 ft. x 15 ft. deep x 5 ft. wide	=	494,700 cu. ft.	=	18,322 cu. yd.
Service Connections:	63 x 15 ft. long x 15 ft. deep x 3 ft. wide	=	1,525 cu. ft.	=	1575 cu. yd.
Manholes:	30 x 16 ft. deep x 7 ft. long x 7 ft. wide	=	23,520 cu. ft.	=	871 cu. yd.
Total Earth Disturbance – Collection System					20,768 cu. yd.

The vast majority of the earth disturbance activities within the collection system will take place in areas that have previously been disturbed. Previous disturbances include roadway construction, storm water infrastructure and other underground utilities.

Total Project Estimated Project Earth Disturbance = 20,768 cu. yd.

IV. LAND USE

The 63 benefited properties are residential. There are approximately 191 vacant parcels within the boundaries of the project that may be developed into additional residential dwellings or commercial establishments after the project is complete. The lack of a central sanitary sewer collection system has hindered residential and economic development in this area (see Exhibit 5).

V. SPOILS MANAGEMENT

Based on the project cost estimate, a rough estimate of the spoils generated as a result of this project can be calculated as follows:

Approximate space occupied by mainline (including bedding):

6,596 ft. x 4 ft. wide x 4 ft. deep = 105,536 cu. ft. = 3,909 cu. yd.

Approximate space occupied by open cut 6" service connections (including bedding):

945 ft. x 3 ft. wide x 2.5 ft. deep = 7,088 cu. ft. = 263 cu. yd.

Approximate space occupied by manholes (including bedding):

30 x 16 ft. deep x 7 ft. long x 7 ft. wide = 23,520 cu. ft. = 871 cu. yd.

Rough estimate of total spoils generated as a result of the project:

3,909 + 263 + 871 = 5,043 cu. yds.

The contract language dictates the contractor will be responsible for obtaining a spoils disposal site and the conveyance and disposal of all excess soil, debris and materials in an environmentally sound manner in accordance with local, state and federal regulations. The location shall be submitted and approved by the Ohio EPA/DEFA. In addition, the site must also be submitted and approved by the Trumbull County Soil & Water Conservation District. There shall be no disposal allowed in or near any water body, floodplain, wetland, drainage course or any other environmentally sensitive area, even with the permission of the property owner.

VI. BORROW MATERIAL

The contract language dictates the contractor shall be responsible for the procurement of borrow material. In most cases, the borrow material used by the contractor originates from a commercial source; However, depending on which contractor is awarded the contract, there is no way to currently identify the potential location of borrow material and whether or not it will be classified as having a commercial source. The contractor will be required to receive approval from Ohio EPA/DEFA if borrow material from a non-commercial source is used. Furthermore, as mentioned previously, the spoils from the collection system construction may be used at the package WWTP site if approved by the regulating authorities.

VII. SCOPE OF EXISTING/FUTURE NEEDS

The primary need for the remediation of the existing conditions is to protect the health and safety of the property owners in the vicinity of the project area. The failed off-lot septic systems have led to unsanitary conditions which will persist if the situation is not addressed.

The project area is within the Clean Water Act Section 208 Area Wide Water Quality Management Plan (the general plan) for sanitary sewers in Trumbull County and part of Trumbull County's Combined Sanitary Sewer District. The proposed system to be constructed as a result of this project will be operated and maintained by the Trumbull County Sanitary Engineers. There are a total of 63 structures within the scope of the project and approximately 191 vacant parcels which may accommodate an additional 60 structures.

VIII. FLOW EVALUATION

The design of the sanitary collection system involved the assignment of estimated sewage flows for the existing and future potential connections in the project area. Each of the 63 single family residential equivalent connections (1 SRE) are assumed to generate an average daily flow of 400 gallons/day. There is a potential of approximately 60 additional one-SRE connections that may be added as a result of in-fill housing. This adds up to a total of 123 SRE's to be used to determine the average daily flow and peak daily flow. A peaking factor of 4.28 for a collector sewer (in accordance with the general plan) was then multiplied by the total average daily flow to determine the peak daily flow.

The design flows were calculated as follows:

Average daily flow = 123 SRE's x 400 Gallons/SRE = 49,200 GPD

Peak daily flow = 49,200 GPD x 4.28 (peak factor) = 210,576 GPD

The above flows, along with the site topography, were used to determine the size, depth and slope of the sanitary sewer lines in the project area as reflected in the construction drawings previously submitted.

IX. ALTERNATIVE EVALUATIONS

The goal of the proposed project is to provide proper collection from existing structures in the project area. The evaluated alternatives include either the installation of new household sewage treatment systems (HSTS'S) or constructing a new central sewage collection system to convey the flow to the City of Girard Regional WWTP.

IXA. ALTERNATE 1 - HOME SEWAGE TREATMENT SYSTEM REPLACEMENTS

The criteria used by the Trumbull County Board of Health for approval of a HSTS include soil permeability, housing density, and lot size. Recent data suggests that at least 90% of the existing septic systems would fail the current treatment requirements established by the Board of Health.

For this alternative, an assumption has been made that 90% of the existing septic systems would require replacement in order to fulfill the goal of the project. Of the 63 existing structures that are currently serviced by a HSTS, the majority will require off-lot discharge into existing ditches and storm sewers which will eventually enter waters of the state. Therefore, the majority of the new off-lot septic systems will require the following components as a minimum:

1. A settling tank with adequate depth and volume to separate and hold primary solids.
2. An aeration system to reduce the biochemical oxygen demand (BOD) of the waste stream.
3. Properly sized alternating sand filters to reduce suspended solids.
4. Disinfection utilizing a chlorination/dechlorination system.

IXB. ALTERNATIVE 2 - CONVENTIONAL COLLECTION SYSTEM & REGIONALIZED TREATMENT

This alternative proposes the collection of sanitary flow from the project area by gravity sewer and channeling it to the City of Girard Regional WWTP for treatment. The main components of this alternative include approximately 6,596 linear feet of PVC collector sewer, 63 service laterals in the public right-of-way and approximately 40 precast concrete manholes. Sewer depth ranges from 8 to 18 feet to provide basement service. Design engineering for this alternative is complete and the Permit-to-Install (PTI) was issued by the OEPA/DEFA on October 11, 2024 (see Exhibit 4).

X. PRESENT WORTH/COST EFFECTIVENESS ANALYSIS

XA. ALTERNATIVE 1-HSTS REPLACEMENTS

As mentioned in section IXA of this report, the majority of HSTS replacements will require off-lot discharge. Recent experience and information provided by the Trumbull County Board of Health dictates the initial cost for installation of a HSTS similar to the type described in section IXA will average at least \$15,000.00 per residential dwelling or business. The responsibility for operation and maintenance of the new HSTS will be placed on the property owner. The values illustrated in the table below represent average annual operation and maintenance costs based on Trumbull County's experience with similar off-lot treatment system installations. Furthermore, the off-lot systems will require inspection annually and will require clean-out approximately every 2 years.

NEW HSTS ESTIMATED ANNUAL O & M COSTS

<u>Description</u>	<u>Annual cost/unit</u>
Electric- Aeration System	\$250.00
Inspection/Sampling/Permit to Operate	\$125.00
Cleaning (Every 2 Years @ \$100.00 Each)	\$50.00
Agitator/Motor Replacement-Aerator System (Every 10 years @ \$300.00 each)	\$30.00
Chemicals for Disinfection System (Per information from the TCBOH)	\$600.00
<u>Miscellaneous Costs/Service Contracts</u>	<u>\$200.00</u>
Total	\$1255.00

The present worth of this alternative is calculated over a useful life period of 50 years using a federal discount rate of 0.75%. The present worth is the sum of initial construction costs and annual operation and maintenance costs converted to a present equivalent value. For this analysis, future equipment replacement costs have been included in the annual operation costs.

The present worth factor for the annual O&M costs has been determined to be 41.57, which represents the present worth factor for a uniform series at 0.75% over a period of 50 years. The present worth formula used to arrive at the 41.57 factor is:

$$PW = \frac{1 - (1 + i)^{-n}}{i}$$

The Present Worth of Alternative 1 for the 63 structures that are currently serviced by an HSTS is:

$$\$15,000.00 (63 \times .90) + \$1,255.00 (63 \times .90) (41.57) = \$3,808,558.85$$

The Present Worth for each Residential Dwelling is:

$$\$3,808,558.85 \div 63 = \$60,453.32$$

XB. ALTERNATIVE 2 - CONVENTIONAL COLLECTION SYSTEM AND REGIONALIZED TREATMENT

The tentative total project cost not covered by grant funds for the central collection system is approximately \$1,500,000.00 (ss Exhibit 2). The annual O&M cost for mainline sewer per industry standards is \$700.00/mile/year. Therefore, the annual O&M for this alternative is:

$$6,596 \text{ feet} \times \frac{1 \text{ Mile}}{5,280 \text{ Feet}} \times \frac{\$700.00}{\text{Mile}} = \$874.47$$

The rate for sewage treatment for the Trumbull County's Combined Sanitary Sewer District when this project is complete will be \$9.75 per 1000 gallons plus a \$3.00/month replacement improvement fee. The average household can expect an annual sewer bill (based on 5000 gallon/month) equal to:

$$5000 \text{ gal/month} \times \$9.75/1000 \text{ gals} \times 12 \text{ months/year} + \$3.00 (12) = \$621.00$$

The Present Worth of Alternative 2 for the 250 Proposed Connections is:

$$\$1,500,000.00 + \$874.47 (41.57) + \$621.00 (63) (41.57) = \$3,162,694.83$$

The Present Worth for each Benefited Resident is:

$$\$3,162,694.83 \div 63 = \$50,201.50$$

XI. RECOMMENDED ALTERNATIVE

The construction of the conventional gravity sanitary sewer collection system (Alternative #2) is the proposed project to provide service to the project area. This recommended alternative is the most economical and environmentally conscious approach to satisfy the needs of the affected residents and Trumbull County. Furthermore, this recommended alternative is compatible with the long-term wastewater planning efforts of the Region's Clean Water Act Section 208 Area Wide Water Quality Management Plan.

XII. PUBLIC PARTICIPATION

A public hearing for this project will be held prior to construction with an approximate 30 day public comment period. All costs expected to be incurred by all property owners will be disclosed in the public hearing notices mailed to each property owner.

Statutory Checklist Instructions:

For each of the environmental laws and authorities listed below, determine the level of compliance required and provide a narrative explanation and list of supporting documentation. **The narrative must explain decision-making and compliance procedures.** Attach all supporting documentation to this worksheet.

Environmental Assessment Checklist Instructions:

Evaluate the significance of the effects of the proposed activity on the character, features, and resources of the project area. Provide a narrative explanation and list of supporting documentation. **The narrative must explain decision-making and compliance procedures.** Attach all supporting documentation to this worksheet. For technical assistance, see HUD's [Environmental Assessment Factors Guidance](#).

Environmental Assessment Checklist

Land Development		
Impact Category	Impact Code	Explanation and List of Source Documentation
Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design	Potentially Beneficial	The project is in conformance with Eastgate Regional Council of Government's Areawide Water Quality Management Plan (AWQMP). Please see the attached Eastgate letter dated May 13, 2025 stating that this project is compliant with the region's 208 Water Quality Management Plan (208 Plan) and alleviates unsanitary conditions from malfunctioning home sewage treatment systems.
Soil Suitability / Slope / Erosion / Drainage / Storm Water Runoff	No Impact Anticipated	There are no changes anticipated for existing slope or topography as a result of the project. See attached correspondence with the Trumbull County Soil and Water Conservation District dated May 24, 2025.
Hazards and Nuisances Including Site Safety and Noise	Potentially Beneficial	Please see attached letters/comments received by various state and local agencies stating that the elimination of failing HSTS' is beneficial to the environment.
Energy Consumption	No Impact Anticipated	The project does not involve residential new construction or substantial rehabilitation of single-family housing or multi-family buildings up to three stories.

Environmental Assessment Checklist

Socioeconomic		
Impact Category	Impact Code	Explanation and List of Source Documentation
Employment and Income Patterns	Potentially Beneficial	The project is small in scale and will not significantly increase temporary and/or permanent employment opportunities although contractors bidding on this project will be informed of Section 3 incentives offered by Trumbull County.
Demographic Character Changes, Displacement	No Impact Anticipated	The project will not impact the racial or ethnic composition of the households or produce permanent physical barriers to the neighborhood isolating the area from access to local services, facilities, and institutions or other parts of the townships. The project will not result in the creation of a concentration of low-income or disadvantaged people.

Community Facilities and Services		
Impact Category	Impact Code	Explanation and List of Source Documentation
Educational and Cultural Facilities	No Impact Anticipated	The project will have no impact on student population. The project will have no impact to accessibility to schools. All traffic safety consideration will be incorporated into the project implementation phase to ensure bus routes are not affected.
Commercial Facilities	Potentially Beneficial	The existing retail and commercial services located within or nearby the project area will not be adversely affected. During construction, traffic control BMP's will be in place and no road closures are anticipated.
Health Care and Social Services	No Impact Anticipated	The project will have no impact on the need for area health care services beyond current capacity
Solid Waste Disposal / Recycling	No Impact Anticipated	It is not anticipated that the project will result in the generation of construction debris or solid waste debris, including hazardous waste, if any.
Waste Water / Sanitary Sewers	Potentially Beneficial	The proposed sanitary sewer system will provide satisfactory service to the project area and eliminate the failing HSTS contributing to contamination of the groundwater in the area.

Environmental Assessment Checklist

Community Facilities and Services		
Impact Category	Impact Code	Explanation and List of Source Documentation
Water Supply	Potentially Beneficial	The proposed sanitary sewer system will provide satisfactory service to the project area and eliminate the failing HSTS' contributing to contamination of the groundwater in the area that affects water wells in use by residents.
Public Safety – Police, Fire and Emergency Medical	No Impact Anticipated	The project will not have a significant burden on police, fire or health care providers in terms of manpower and/or equipment.
Parks, Open Space and Recreation	Potentially Beneficial	The elimination of failing HSTS' and contamination of groundwater and drainage ditches will have a beneficial impact on the neighborhood. The proposed project will not overload existing open space, recreational or cultural facilities.
Transportation and Accessibility	No Impact Anticipated	The proposed project will not cause a significant adverse impact on the local or regional transportation system and will not serve as a barrier to emergency vehicle access which will be addressed in the traffic control plan during the implementation phase.

Natural Features		
Impact Category	Impact Code	Explanation and List of Source Documentation
Unique Natural Features, Water Resources	Potentially Beneficial	The project location and construction will not adversely impact unique or locally important natural features on or near the site nor will the project destroy or isolate from public or scientific access any unique natural features. The project will not negatively affect the depth or character of the water table or aquifer. Failing septic systems will be eliminated as a result of the project improving groundwater quality. There will be no substantial increase in impervious surface area as a result of this project nor is it located in a state or locally designated sensitive watershed area. See attached letters from state and local agencies with their comments.
Vegetation and Wildlife	Potentially Beneficial	The project will not involve the introduction of nuisance or non-indigenous species of vegetation or damage or destroy existing remnant or endemic plant communities or locally rare species. The project will not damage or destroy any plant species that are legally protected by state or local ordinances nor will it damage or destroy trees without replacement and landscaping. The project will not create special hazards for animal life nor will impact migratory birds. The project site does not contain any species that are monitored or listed by local, state, tribal or the federal government nor will it damage or

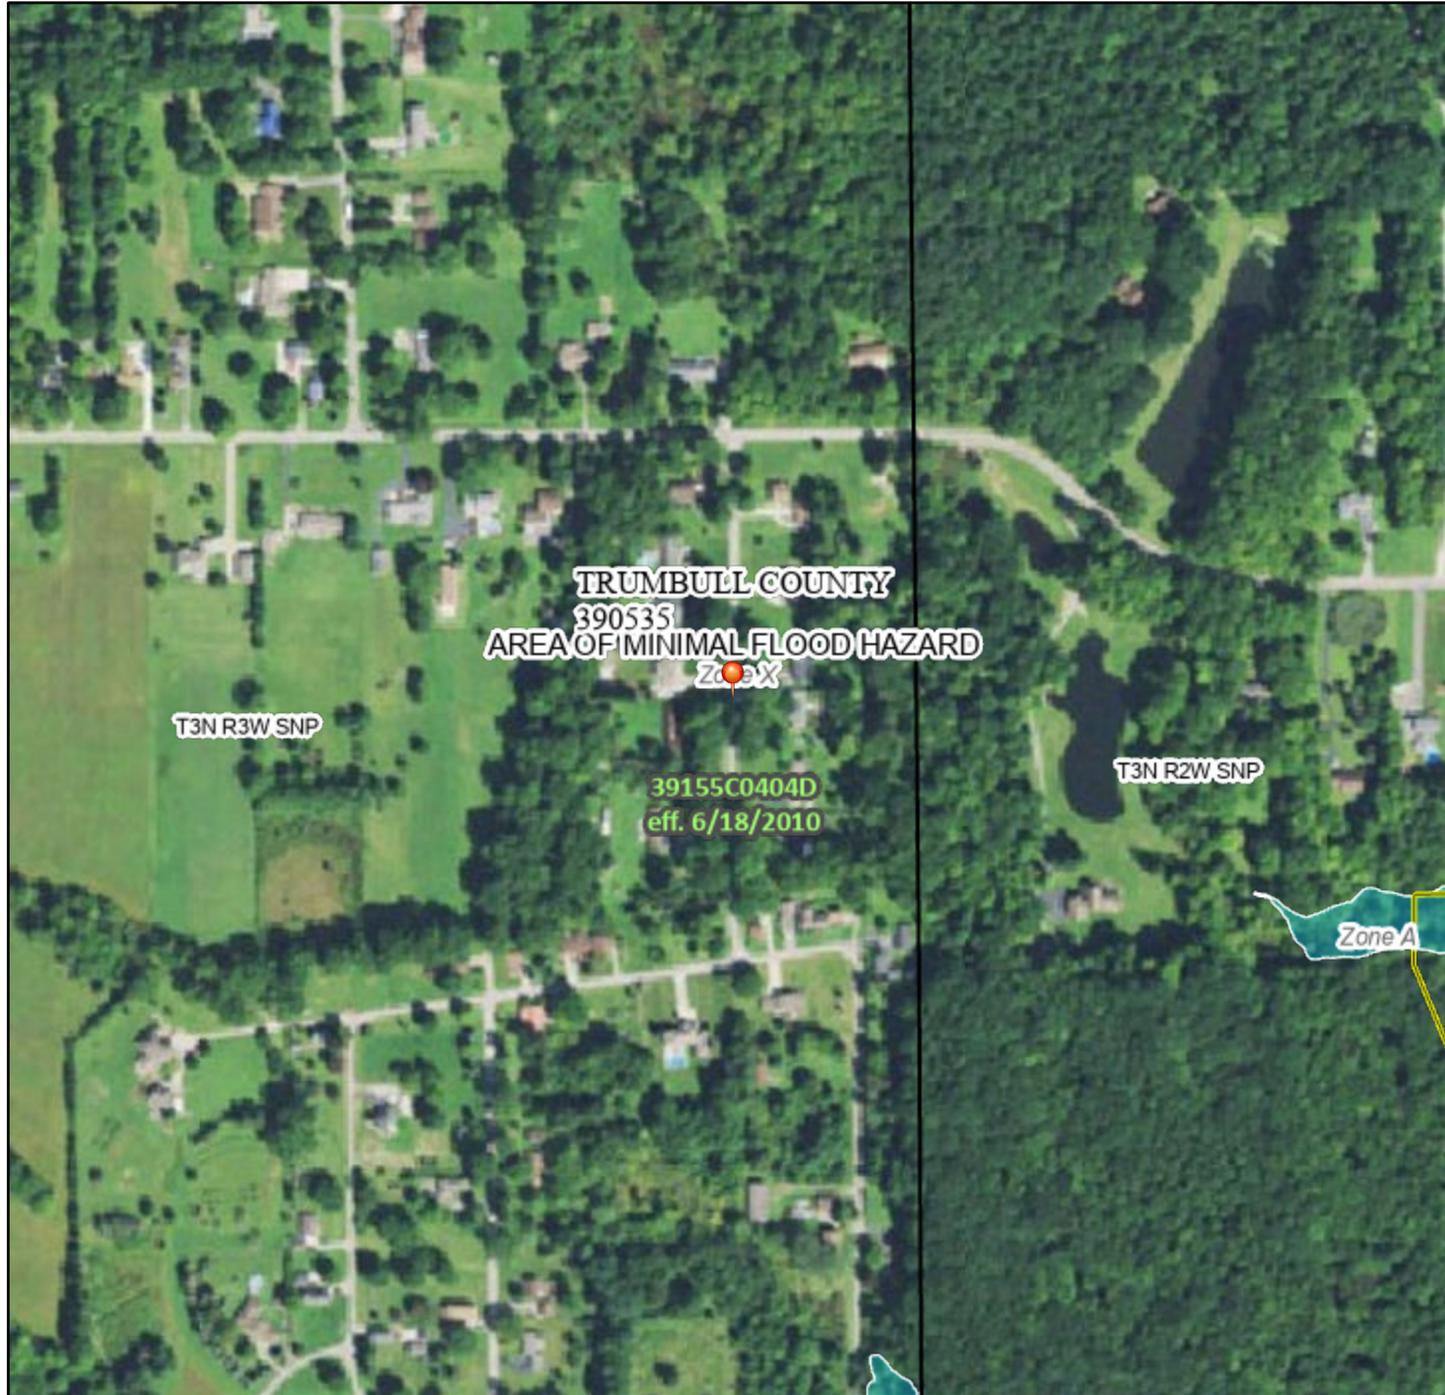

Environmental Assessment Checklist

Natural Features		
Impact Category	Impact Code	Explanation and List of Source Documentation
		destroy existing wildlife habitats. There is no excessive grading planned as part of this project. The project will not affect game fish habitat or spawning grounds. Erosion control measures and stormwater run-off measures are incorporated in the implementation phase of the project. The project will not create conditions favorable to the proliferation of pest species nor create conditions (e.g., generate excessive noise, introduce pesticide usage) that could harm or harass wildlife species that are nationally, regionally or locally rare or protected by state or local ordinance. See attached correspondence from the U.S. Fish & Wildlife Service dated May 23,2025, and correspondence from the Ohio EPA dated May 20, 2025.
Other Factors	No Impact Anticipated	None

24 CFR Section 58.6 Requirements

Airport Runway Clear Zones and Clear Zones Notification

[24 C.F.R. Part 51.303(a)(3)]

Does the project involve the sale or acquisition of property located within a Civil Airport Runway Clear Zone or a Military Airfield Clear Zone?

- No. **Attach Source Document:**
(Project complies with 24 CFR 51.303(a)(3).)
- Yes. **Notice must be provided to buyer.** The notice must advise the buyer that the property is in a Runway Clear Zone or Clear Zone, what the implications of such a location are, and that there is a possibility that the property may, at a later date, be acquired by the airport operator. The buyer must sign a statement acknowledging receipt of this information. (for a sample notice, see the [HUD Exchange](#)) **(attach a copy of the signed notice)**

Coastal Barrier Resources Act

[Coastal Barrier Improvement Act of 1990 (16 U.S.C. 3501)]

Is the project located in a [coastal barrier resource area](#)?

- No. **Cite or attach Source Document.**
(Proceed with project.)
- Yes. Federal assistance may not be used in such an area.

Flood Disaster Protection Act*

[Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001-4128)]

Does the project involve acquisition, construction or rehabilitation of structures located in a FEMA-identified Special Flood Hazard Area?

- No. **Attach copy of [Flood Insurance Rate Map \(FIRM\)](#)**
- Yes. **Attach copy of [Flood Insurance Rate Map \(FIRM\)](#)**

Is the community participating in the National Insurance Program (or has less than one year passed since FEMA notification of Special Flood Hazards)?

- Yes. Flood Insurance under the National Flood Insurance Program must be obtained. If HUD assistance is provided as a grant, insurance must be maintained for the economic life of the project and in the amount of the total project cost (or up to the maximum allowable coverage, whichever is less). If HUD assistance is provided as a loan, insurance must be maintained for the term of the loan and in the amount of the loan (or up to the maximum allowable coverage, whichever is less).
(Attach a copy of the flood insurance policy declaration)

- No. **Federal assistance may not be used in the Special Flood Hazard Area.**

**Per 24 CFR 58.6(a)(3), this requirement does not apply to State-administered CDBG, HOME, and ESG programs.*

Statement of Process and Status of Environmental Analysis

Instructions:

Provide a brief description of the administrative procedures associated with the construction and presentation of the environmental review record (ERR). List the Responsible Entity, Certifying Officer, the physical location of the ERR, the dates and comment periods associated with any public notices, and contact information for the submission of comments regarding the ERR.

The Trumbull County Planning Commission, on behalf of the Responsible Entity, the Board of Trumbull County Commissioners, conducted an environmental assessment pursuant to 24 CFR Part 58 for the PY2024 CDBG Residential Public Infrastructure Grant Program proposed for funding a portion of the Crain Drive Sanitary Sewer Project; Weathersfield Township, Trumbull County, Ohio.

Responsible Entity – Board of Trumbull County Commissioners’ 160 High Street NW, 5th Floor, Warren, Ohio, 44481, Trumbull County Ohio

Certifying Officer – Mr. Rick Hernandez, President, Board of Trumbull County Commissioners’

Physical location of the ERR – Trumbull County Planning Commission, 185 East Market Street, 2nd Floor, Suite A, Warren, Ohio 44481

Dates and Comment Period associated with the Combined Notice FONSI/RRROF: Publication Date- August 7, 2025, Last Day for Comment- August 24, 2025, Date Sent to OCD – August 25, 2025, Estimated Last Date of Objection- September 10, 2025, Release of Funds- September 11, 2025.

Contact Information for the Submission of Comments Regarding the ERR:

Andrew Cvetkovich, Environmental Coordinator
Trumbull County Planning Commission
185 East Market Street, 2nd Floor, Suite A
Warren, Ohio 44481
330-675-6640
Fax: 330-675-2790

Description of the Site and Environmental Context

Instructions:

Determine existing conditions and describe the character, features, and resources of the project area and its surroundings. Identify the trends that are likely to continue in the absence of the project.

The existing condition of the project area consists of residential neighborhoods as well as commercial locations. Single family homes, small businesses, a park and a family farm comprise the character of the project area. Assuming the absence of this project, contamination of the groundwater from failing HSTS's owned by the residents will continue which create an unsafe environment. Moreover, because this project will have a positive effect on all people within and around the project area, this project's absence will further disadvantage the project area's LMI population.

Analysis of Alternatives

Instructions:

Examine alternatives to the project, including the alternative of no action.

See attached Alternatives Analysis prepared by the Trumbull County Sanitary Engineer's Office.

Analysis of Impacts and Mitigation Actions

Instructions:

Summarize and evaluate all potential environmental impacts, whether beneficial or adverse, and the conditions that would change because of the project. Describe measures to eliminate, minimize, or mitigate adverse environmental impacts.

Trumbull County is in maintenance status for ozone, which is a maintenance level pollutant. Therefore, we will ensure that emissions levels for this project will not exceed de minimis levels for ozone. To accomplish this, contractors will not be utilizing generators and instead will use on-site power. Additionally, the contractors will be advised to follow Best Management Practices (BMP's).

Impacts to streams, wetlands and other water resources must be avoided and minimized to the fullest extent possible. Therefore, The Division of Wildlife (DOW) requests that Best Management Practices (BMP's) be utilized to minimize erosion and sedimentation.

If trees are present within the project area, and trees must be cut, the DOW recommends cutting only occur from October 1 through March 31, conserving trees with loose, shaggy bark and/or crevices, holes, or cavities, as well as trees with DBH ≥ 20 if possible. If trees are present within the project area, and trees must be cut during the summer months, the DOW recommends a mist net survey or acoustic survey be conducted from June 1 through August 15, prior to any cutting. Mist net and acoustic surveys should be conducted in accordance with the most recent version of the "OHIO DIVISION OF WILDLIFE GUIDANCE FOR BAT SURVEYS AND TREE CLEARING".

The Trumbull County Planning Commission will ensure that mitigation actions are incorporated into the bid document and plans for this project.

Correspondence has been initiated with the following agencies, and Tribes:

Eastgate Regional Council of Governments, U.S. Fish & Wildlife Service, Ohio Division of Natural Resources, Ohio Environmental Protection Agency, State of Ohio Historic Preservation Office, Trumbull County Combined Health District, Trumbull County Soil and Water Conservation District, Eastern Shawnee Tribe of Oklahoma, Miami Tribe of Oklahoma, and the Seneca-Cayuga Nation of Oklahoma, U.S. Army Corps of Engineers, Heritage Accord, Nile Historical Society, Mineral Ridge Historical Society, U.S. Department of Agriculture.

The correspondence letters along with relevant comments and responses will be included in the final record.

Monitoring and Enforcement Procedures

Instructions:

Describe any post-review monitoring or enforcement procedures associated with environmental mitigation actions.

The consulting engineer and any other contracted stakeholders will be notified of the relevant steps for compliance with this environmental review. The Trumbull County Planning Commission will ensure that mitigation actions are incorporated into the bid document and plans for this project.

Megan Seymour
Acting Field Supervisor
U.S. Department of the Interior
United States Fish & Wildlife Service
4625 Morse Road, Suite 104
Columbus, Ohio 43230

Dear Ms. Seymour:

Re: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Trumbull County, on behalf of the Ohio Department of Development and the United States Department of Housing and Urban Development, is in the process of performing an environmental review pursuant to Statutes, Executive Orders and Regulations set forth under 24 CFR Part 58 for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. The project is being constructed in accordance with the County's General Plan for Sewage.

We would like to request your review and comments related to any potential adverse or beneficial environmental impacts of the proposed Crain Drive Sanitary Sewer Project. Enclosed please find an IPaC generated Species List, location/service area map of the proposed sanitary sewer, and a list of benefiting properties. Below is a description of the project scope for your reference. A copy of this letter and USFWS's response will be placed in the environmental review record for the proposed project.

Crain Drive Sanitary Sewer Project Area – Weathersfield Township:

The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Niles have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Niles Waste Water Treatment Plant (WWTP).

Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for

Tony Bernard, Commissioner • Rick Hernandez, Commissioner • Denny Malloy, Commissioner
David Barran • James Davies • Melissa Miller • Bob Moody
Rachel E. Nader • Phillip M. Pegg • Lisa Ramsey • Darlene St. George

eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through completion.

Trumbull County appreciates your review of this project and requests information on cultural resources or historic properties, as well as any other concerns that you may have.

If you have any questions, please contact me at andrew.cvetkovich@co.trumbull.oh.us or 330-675-6640.

Respectfully,
Andrew Cvetkovich

Project Code: 2025-0095432

Project Name: Trumbull County - Crain Drive Sanitary Sewer Project

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf>

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see <https://www.fws.gov/program/migratory-bird-permit/what-we-do>.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see <https://www.fws.gov/library/collections/threats-birds>.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/partner/council-conservation-migratory-birds>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

- Official Species List

OFFICIAL SPECIES LIST

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Ohio Ecological Services Field Office

PROJECT SUMMARY

Project Code: 2025-0095432

Project Name: Trumbull County - Crain Drive Sanitary Sewer Project

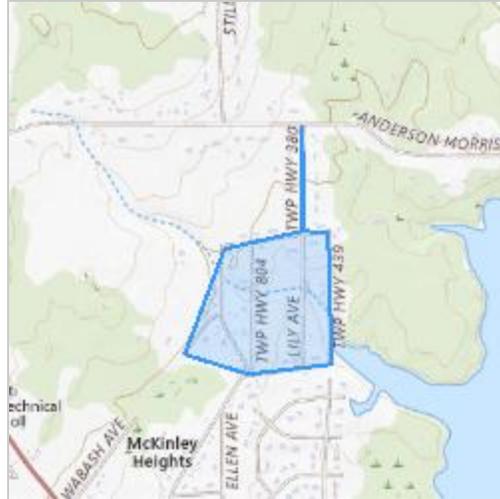

Project Type: Utility Infrastructure Maintenance

Project Description: The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18” sanitary sewer, 963 feet of 15” sanitary sewer, 1,003 linear feet of 12” sanitary sewer, 3,985 linear feet of 8” sanitary sewer, and 1,131 linear feet of 6” sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Niles have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Niles Waste Water Treatment Plant (WWTP).

Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through completion.

Project Location:

The approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@41.1904265,-80.71393408273666,14z>

Counties: Trumbull County, Ohio

ENDANGERED SPECIES ACT SPECIES

There is a total of 3 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

MAMMALS

NAME	STATUS
Indiana Bat <i>Myotis sodalis</i> There is final critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/5949	Endangered

REPTILES

NAME	STATUS
Eastern Massasauga (=rattlesnake) <i>Sistrurus catenatus</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/2202	Threatened

INSECTS

NAME	STATUS
Monarch Butterfly <i>Danaus plexippus</i> There is proposed critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/9743	Proposed Threatened

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

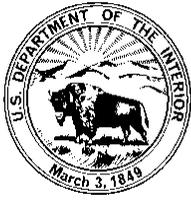

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

Project Code: 2025-0095432

Dear Mr. Cvetkovich:

The U.S. Fish and Wildlife Service (Service) has received your recent correspondence requesting information about the subject proposal. We offer the following comments and recommendations to assist you in minimizing and avoiding adverse impacts to threatened, endangered, and proposed species pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq), as amended (ESA).

Federally Threatened and Endangered Species: The endangered Indiana bat (*Myotis sodalis*) and northern long-eared bat (*Myotis septentrionalis*) occur throughout the State of Ohio. The Indiana bat and northern long-eared bat may be found wherever suitable habitat occurs unless a presence/absence survey has been performed to document absence. Suitable summer habitat for Indiana bats and northern long-eared bats consists of a wide variety of forested/wooded habitats where they roost, forage, and breed that may also include adjacent and interspersed non-forested habitats such as emergent wetlands and adjacent edges of agricultural fields, woodlots, fallow fields, and pastures. Roost trees for both species include live and standing dead trees ≥ 3 inches diameter at breast height (dbh) that have any exfoliating bark, cracks, crevices, hollows and/or cavities. These roost trees may be located in forested habitats as well as linear features such as fencerows, riparian forests, and other wooded corridors. Individual trees may be considered suitable habitat when they exhibit the characteristics of a potential roost tree and are located within 1,000 feet of other forested/wooded habitat. Northern long-eared bats have also been observed roosting in human-made structures, such as buildings, barns, bridges, and bat houses; therefore, these structures should also be considered potential summer habitat. In the winter, Indiana bats and northern long-eared bats hibernate in caves, rock crevices and abandoned mines.

Federally Proposed Species: On September 14, 2022, the Service proposed to list the tricolored bat (*Perimyotis subflavus*) as endangered under the ESA. The bat faces extinction due to the impacts of white-nose syndrome, a deadly disease affecting cave-dwelling bats across the continent. During spring, summer, and fall, this species roosts primarily among leaf clusters of live or recently dead trees, emerging at dusk to hunt for insects over waterways and forest edges. While white-nose syndrome is by far the most serious threat to the tricolored bat, other threats now have an increased significance due to the dramatic decline in the species' population. These threats include disturbance to bats in roosting, foraging, commuting, and over-wintering habitats. Mortality due to collision with wind turbines, especially during migration, has also been documented across their range. Conservation measures for the Indiana bat and northern long-eared bat will also help to conserve the tricolored bat.

Seasonal Tree Clearing for Federally Listed Bat Species: Should the proposed project site contain trees ≥ 3 inches dbh, we recommend avoiding tree removal wherever possible. If any caves or abandoned mines may be disturbed, further coordination with this office is requested to determine if fall or spring portal surveys are warranted. If no caves or abandoned mines are present and trees ≥ 3 inches dbh cannot be avoided, we recommend removal of any trees ≥ 3 inches dbh only occur between October 1 and March 31. Seasonal clearing is recommended to avoid adverse effects to Indiana bats and northern long-eared bats.

If implementation of this seasonal tree cutting recommendation is not possible, a summer presence/absence survey may be conducted for Indiana bats and northern long-eared bats. If Indiana bats and northern long-eared bats are not detected during the survey, then tree clearing may occur at any time of the year. Surveys must be conducted by an approved surveyor and be designed and conducted in coordination with the Ohio Field Office. Surveyors must have a valid federal permit. Please note that in Ohio summer mist net surveys may only be conducted between June 1 and August 15.

Section 7 Coordination: If there is a federal nexus for the project (e.g., federal funding provided, federal permits required to construct), then no tree clearing should occur on any portion of the project area until consultation under section 7 of the ESA, between the Service and the federal action agency, is completed. We recommend the federal action agency submit a determination of effects to this office, relative to the Indiana bat and northern long-eared bat, for our review and concurrence. This letter provides technical assistance only and does not serve as a completed section 7 consultation document.

Stream and Wetland Avoidance: Over 90% of the wetlands in Ohio have been drained, filled, or modified by human activities, thus is it important to conserve the functions and values of the remaining wetlands in Ohio (https://epa.ohio.gov/portals/47/facts/ohio_wetlands.pdf). We recommend avoiding and minimizing project impacts to all wetland habitats (e.g., forests, streams, vernal pools) to the maximum extent possible in order to benefit water quality and fish and wildlife habitat. Additionally, natural buffers around streams and wetlands should be preserved to enhance beneficial functions. If streams or wetlands will be impacted, the U.S. Army Corps of Engineers should be contacted to determine whether a Clean Water Act section 404 permit is required. Best management practices should be used to minimize erosion, especially on slopes. Disturbed areas should be mulched and revegetated with native plant species. In addition, prevention of non-native, invasive plant establishment is critical in maintaining high quality habitats.

Due to the project type, size, and location, we do not anticipate adverse effects to any other federally endangered, threatened, or proposed species, or proposed or designated critical habitat. Should the project design change, or additional information on listed or proposed species or their critical habitat become available, or if new information reveals effects of the action that were not previously considered, coordination with the Service should be initiated to assess any potential impacts.

Thank you for your efforts to conserve listed species and sensitive habitats in Ohio. We recommend coordinating with the Ohio Department of Natural Resources due to the potential for the proposed project to affect state listed species and/or state lands. Contact Mike Pettegrew, Environmental Services Administrator, at (614) 265-6387 or at mike.pettegrew@dnr.ohio.gov.

If you have questions, or if we can be of further assistance in this matter, please contact our office at (614) 416-8993 or ohio@fws.gov.

Sincerely,

A handwritten signature in cursive script, appearing to read "Erin Knoll".

Cortland, OH 44410

Director Wilster,

Re: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Trumbull County, on behalf of the Ohio Department of Development and the United States Department of Housing and Urban Development, is in the process of performing an environmental review pursuant to Statutes, Executive Orders and Regulations set forth under 24 CFR Part 58 for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. The project is being constructed in accordance with the County's General Plan for Sewage.

We would like to request your review and comments related to any potential adverse or beneficial environmental impacts of the proposed Crain Drive Sanitary Sewer Project. Enclosed please find a location/service area map of the proposed sanitary sewer, a list of benefiting properties, and a map supporting the determination that the project does not impact on- or off-site wetlands. Below is a description of the project scope for your reference. A copy of this letter and the Trumbull County Combined Health District's response will be placed in the environmental review record for the proposed project.

Crain Drive Sanitary Sewer Project Area – Weathersfield Township:

The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Girard have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Girard Waste Water Treatment Plant (WWTP).

Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through completion.

Tony Bernard, Commissioner • Rick Hernandez, Commissioner • Denny Malloy, Commissioner
David Barran • James Davies • Melissa Miller • Bob Moody

Re: Environmental Review for the Crain Drive Sanitary Sewer Project

Dear Mr. Cvetkovich:

I am writing to express the Trumbull County Combined Health District's support for the Crain Drive Sanitary Sewer Project.

The staff of the Trumbull County Combined Health District work to protect and promote the health and well-being of our community and prevent disease, disparity, and harm to our residents. The protection of our region's water quality is an essential component of this mission and one that impacts every resident of Trumbull County. As such, the Trumbull County Combined Health District recognizes the Crain Drive Sanitary Sewer Project's important public health implications and values the project's commitment to protecting the area's water quality.

There are no adverse environmental conditions that arise from sanitary sewers. Therefore, this office is not opposed to this project due to the fact that we have identified a number of faulty discharging septic systems and have multiple systems registered on our Operations and Maintenance program. This project will eliminate those multipoint discharges and improve the water quality in the area.

Sincerely,

Kristofer J. Wilster, MPH, REHS
Director of Environmental Health
Trumbull County Combined Health District

Dr. Rouan,

Re: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Trumbull County, on behalf of the Ohio Department of Development and the United States Department of Housing and Urban Development, is in the process of performing an environmental review pursuant to Statutes, Executive Orders and Regulations set forth under 24 CFR Part 58 for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. The project is being constructed in accordance with the County's General Plan for Sewage.

We would like to request your review and comments related to any potential adverse or beneficial environmental impacts of the proposed Crain Drive Sanitary Sewer Project. Enclosed please find a location/service area map of the proposed sanitary sewer, and a list of benefiting properties. Below is a description of the project scope for your reference. A copy of this letter and your response will be placed in the environmental review record for the proposed project.

Crain Drive Sanitary Sewer Project Area – Weathersfield Township:

The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Girard have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Girard Waste Water Treatment Plant (WWTP).

Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through

Tony Bernard, Commissioner • Rick Hernandez, Commissioner • Denny Malloy, Commissioner
David Barran • James Davies • Melissa Miller • Bob Moody
Rachel E. Nader • Phillip M. Pegg • Lisa Ramsey • Darlene St. George

completion.

Trumbull County appreciates your review of this project.

If you have any questions, please contact me at andrew.cvetkovich@co.trumbull.oh.us or 330-675-6640.

Respectfully,
Andrew Cvetkovich

RE: Environmental Review – Crain Drive Sanitary Sewer Project (B-W-24-1CS-2)

Dear Mr. Cvetkovich,

Thank you for your letter regarding the environmental review for the Crain Drive Sanitary Sewer Project in Weathersfield Township. Weathersfield Township is unaware of any potential adverse environmental impacts associated with the proposed project. On the contrary, we believe the project will have significant positive environmental benefits.

The Crain Drive Sanitary Sewer Project area, which located within Weathersfield Township, is currently plagued by failing home sewage treatment systems. These systems have resulted in unsanitary conditions, groundwater contamination, and direct discharges into waters of the State, posing serious public health and environmental risks. The installation of centralized sanitary sewer service through this project will eliminate these failing systems.

The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Girard have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Girard Waste Water Treatment Plant (WWTP). By addressing these longstanding sanitation issues, the project will enhance water quality, reduce environmental degradation, and protect sensitive groundwater resources.

We appreciate the opportunity to contribute to the environmental review record and look forward to the successful implementation of this critical infrastructure improvement. Please do not hesitate to contact our office if further information is needed.

Respectfully:

Dr. David A. Rouan, AICP
Township Administrator

Re: Crain Drive SS
Permit # SS25001-WE

The Cain Drive Sanitary Sewer project has been approved by the Trumbull County Soil and Water Conservation District contingent upon the following:

- The owner, builder and contractor(s) must follow the plan, construction sequence and erosion and sediment control (ESC) details to prevent damage or degradation of waterways and/or adjacent property.
- All work should be performed in accordance with the Rainwater and Land Development Manual, Ohio's Standards for Stormwater Management, Land Development and Urban Stream Protection, 2006.
- A copy of the approved SWP3 and internal inspection reports must be available onsite.
- A pre-construction meeting must be set up with this office no less than 7 days prior to soil disturbing activities.
- If anything changes in the approved SWP3, a copy must be resubmitted to this office.
- The contractors contact information must be submitted when available.
- The owner and contractor/s must sign and certify the SWP3 prior to the start of construction.
- Approval of coverage under the Ohio EPA's NPDES permit must be obtained and supplied to this office.
- The revised SWP3 must be signed and sealed by an engineer registered in the State of Ohio.

Future site inspections may require on-site modifications or additions to erosion and sediment controls not currently shown on the approved plans.

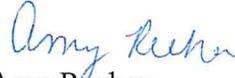

This permit will expire three years after the issue date. If construction for this project is not anticipated to be complete at this time, the permit must be renewed before it expires. All permits renewed after the expiration date must re-submit all of the appropriate fees.

If you have any questions or concerns, feel free to contact me at the Trumbull Soil and Water Conservation District. Our office is open Monday through Friday from 8:30 a.m. to 4:30 p.m. I can be reached at 330-637-2056, ext. 8620 or by email at marcus@trumbullohswcd.org

RE: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Dear Mr. Cvetkovich,

The Eastgate Regional Council of Governments (Eastgate) received the Trumbull County Planning Commission's environmental review request for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. Upon review with Eastgate's 208 Water Quality Management Plan (208 Plan), Eastgate finds the project consistent with the 208 Plan based on the following:

- The proposed project is compliant with the region's 208 Water Quality Management Plan (208 Plan) and alleviates unsanitary conditions from malfunctioning home sewage treatment systems.

As an advocate for water quality enhancement, Eastgate supports projects connecting to existing sewer infrastructure and is mindful of protecting and enhancing existing water quality within the planning region. If Eastgate can be of further assistance, please feel free to contact me at (234) 254-1520.

Sincerely,

EASTGATE REGIONAL
COUNCIL OF GOVERNMENTS

RE: Section 106 Review
Trumbull County CDBG Residential Public Infrastructure Grant
Grant: B-W-24-1CS-2
Project: Crain Drive Sanitary Sewer

Dear Mr. Cvetkovich:

This letter is in response to the correspondence received on May 12, 2025, regarding the Crain Drive Sanitary Sewer project, Trumbull County, Ohio. The comments of the State Historic Preservation Office (SHPO) are made in accordance with the provisions of Section 106 of the National Historic Preservation Act of 1966, as amended, and the associated regulations at 36 CFR Part 800.

The proposed project will involve the construction of approximately 645 LF of 18-inch sanitary sewer, 963 LF of 15-inch sewer, 1,003 LF of 12-inch sewer, 3,985 LF of 8-inch sewer, and 1,131 LF of 6-inch laterals. In addition, 30 pre-cast manholes and 2,089 LF of storm sewer will be constructed. A check of our records indicates no historic properties, districts, or previously recorded archaeological sites within or adjacent to the proposed work areas. After careful review of the submitted information, the SHPO agrees that the project, as proposed, will have no effect on historic properties. No further coordination is required for this project unless the scope of work changes or archaeological remains are discovered during the course of project construction. In such a situation, this office should be contacted as per 36 CFR § 800.13. If you have any questions concerning this review, please contact me via email at sbiehl@ohiohistory.org. Thank you for your cooperation.

Sincerely,

A handwritten signature in blue ink that reads "Stephen M. Biehl".

Dear Mr. York:

Re: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area- B-W-24-1CS-2

Trumbull County, on behalf of the Ohio Department of Development and the United States Department of Housing and Urban Development, is in the process of performing an environmental review pursuant to Statutes, Executive Orders and Regulations set forth under 24 CFR Part 58 for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. The project is being constructed in accordance with the County's General Plan for Sewage.

Trumbull County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations. To that end, a letter was sent to the State Historic Preservation Office (SHPO), requesting their review of the Project. We request that you consult in this review to help identify historic properties in the project area that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize or mitigate potential adverse effects.

Trumbull County is also requesting review from Paul Barton, THPO with the Eastern Shawnee Tribe of Oklahoma, and William Tarrant, THPO with the Seneca Cayuga Nation of Oklahoma as both have been identified as tribes with interests in Trumbull County, Ohio.

To meet project timeframes, can you please let us know of your interest within 14 days? If you have any initial concerns with the impact of the project on religious or cultural properties, can you please note them in your response? Enclosed is a location map for the project area, and a list benefitting properties.

Below is a description of the project scope for your reference. A copy of this letter and your response will be placed in the environmental review record for the proposed project.

Crain Drive Sanitary Sewer Project Area – Weathersfield Township:

The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the

P.O. Box 453220
Grove, OK 74345

Dear Mr. Tarrant:

Re: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Trumbull County, on behalf of the Ohio Department of Development and the United States Department of Housing and Urban Development, is in the process of performing an environmental review pursuant to Statutes, Executive Orders and Regulations set forth under 24 CFR Part 58 for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. The project is being constructed in accordance with the County's General Plan for Sewage.

Trumbull County is conducting a review of this project to comply with Section 106 of the National Historic Preservation Act and its implementing regulations. To that end, a letter was sent to the State Historic Preservation Office (SHPO), requesting their review of the Project. We request that you consult in this review to help identify historic properties in the project area that may have religious and cultural significance to your tribe, and if such properties exist, to help assess how the project might affect them. If the project might have an adverse effect, we would like to discuss possible ways to avoid, minimize or mitigate potential adverse effects.

Trumbull County is also requesting review from Paul Barton, THPO with the Eastern Shawnee Tribe of Oklahoma, and Logan York, THPO with the Miami Tribe of Oklahoma as both have been identified as tribes with interests in Trumbull County, Ohio.

To meet project timeframes, can you please let us know of your interest within 14 days? If you have any initial concerns with the impact of the project on religious or cultural properties, can you please note them in your response? Enclosed is a location map for the project area and below is a description of the project scope for your reference. A copy of this letter and your response will be placed in the environmental review record for the proposed project.

Crain Drive Sanitary Sewer Project Area – Weathersfield Township:

The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm

Tony Bernard, Commissioner • Rick Hernandez, Commissioner • Denny Malloy, Commissioner

David Barran • James Davies • Melissa Miller • Bob Moody

Rachel E. Nader • Phillip M. Pegg • Lisa Ramsey • Darlene St. George

sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Niles have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Niles Waste Water Treatment Plant (WWTP).

Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through completion.

Trumbull County appreciates your review of this project and requests information on cultural resources or historic properties, as well as any other concerns that you may have.

If you have any questions, please contact me at andrew.cvetkovich@co.trumbull.oh.us or 330-675-6640.

Good afternoon,

I hope your week has gone well.

I am following up on the request for review I submitted through your portal on 5/13/2025.

I received a response from the U.S. Fish & Wildlife Service this afternoon (See attached). It states that they do not anticipate adverse effects to any other federally endangered, threatened, or proposed species, or proposed or designated critical habitat due to the project type, size, and location. However, the letter further states that we must coordinate with ODNR and to contact you.

I understand that I've already submitted the project to you for review, however, I am including this update to ensure consistent communication.

I look forward to receiving your feedback.

Re: 25-0726_Crain Drive Sanitary Sewer Extension

Project: The proposed project involves making extending and improving an existing sewer system.

Location: The proposed project is located in Weathersfield Township, Trumbull County, Ohio.

The Ohio Department of Natural Resources (ODNR) has completed a review of the above referenced project. These comments were generated by an inter-disciplinary review within the Department. These comments have been prepared under the authority of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661 et seq.), the National Environmental Policy Act, the Coastal Zone Management Act, Ohio Revised Code and other applicable laws and regulations. These comments are also based on ODNR's experience as the state natural resource management agency and do not supersede or replace the regulatory authority of any local, state, or federal agency nor relieve the applicant of the obligation to comply with any local, state, or federal laws or regulations.

Natural Heritage Database: A review of the Ohio Natural Heritage Database indicates there are no records of state or federally listed plants or animals within one mile of the specified project area. Records searched date from 1980.

Please note that Ohio has not been completely surveyed and we rely on receiving information from many sources. Therefore, a lack of records for any particular area is not a statement that rare species or unique features are absent from that area.

Fish and Wildlife: The Division of Wildlife (DOW) has the following comments.

The DOW recommends that impacts to streams, wetlands and other water resources be avoided and minimized to the fullest extent possible, and that Best Management Practices be utilized to minimize erosion and sedimentation.

The entire state of Ohio is within the range of the Indiana bat (*Myotis sodalis*), a state endangered and federally endangered species, the northern long-eared bat (*Myotis septentrionalis*), a state endangered and federally endangered species, the little brown bat (*Myotis lucifugus*), a state endangered species, and the tricolored bat (*Perimyotis subflavus*), a state endangered species. During the spring and summer (April 1 through September 30), these species of bats predominately roost in trees behind loose,

exfoliating bark, in crevices and cavities, or in the leaves. However, these species are also dependent on the forest structure surrounding roost trees. If trees are present within the project area, and trees must be cut, the DOW recommends cutting only occur from October 1 through March 31, conserving trees with loose, shaggy bark and/or crevices, holes, or cavities, as well as trees with DBH \geq 20 if possible. If trees are present within the project area, and trees must be cut during the summer months, the DOW recommends a mist net survey or acoustic survey be conducted from June 1 through August 15, prior to any cutting. Mist net and acoustic surveys should be conducted in accordance with the most recent version of the "[OHIO DIVISION OF WILDLIFE GUIDANCE FOR BAT SURVEYS AND TREE CLEARING](#)". If state listed bats are documented, DOW recommends cutting only occur from October 1 through March 31. However, limited summer tree cutting may be acceptable after consultation with the DOW (contact Eileen Wyza at Eileen.Wyza@dnr.ohio.gov).

The DOW also recommends that a desktop habitat assessment is conducted, followed by a field assessment if needed, to determine if a potential hibernaculum is present within the project area. Direction on how to conduct habitat assessments can be found in the current USFWS "[RANGE-WIDE INDIANA BAT & NORTHERN LONG-EARED BAT SURVEY GUIDELINES](#)." If a habitat assessment finds that a potential hibernaculum is present within 0.25 miles of the project area, please send this information to Eileen Wyza for project recommendations. If a potential or known hibernaculum is found, the DOW recommends a 0.25-mile tree cutting and subsurface disturbance buffer around the hibernaculum entrance, however, limited summer or winter tree cutting may be acceptable after consultation with the DOW. If no tree cutting or subsurface impacts to a hibernaculum are proposed, this project is not likely to impact these species.

The project is within the range of the northern brook lamprey (*Ichthyomyzon fossor*), a state endangered fish, and the mountain brook lamprey (*Ichthyomyzon greeleyi*), a state endangered fish. The DOW recommends no in-water work in perennial streams from March 15 through June 30 to reduce impacts to indigenous aquatic species and their habitat. If no in-water work is proposed in a perennial stream, this project is not likely to impact these or other aquatic species.

The project is within the range of the eastern massasauga (*Sistrurus catenatus*), a state endangered and a federally threatened snake species. The eastern massasauga uses a range of habitats including wet prairies, fens, and other wetlands, as well as drier upland habitat. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

The project is within the range of the spotted turtle (*Clemmys guttata*), a state threatened species. This species prefers fens, bogs and marshes, but also is known to inhabit wet prairies, meadows, pond edges, wet woods, and the shallow sluggish waters of small streams and ditches. Due to the location, the type of habitat within the project area, and the type of work proposed, this project is not likely to impact this species.

The project is within the range of the eastern hellbender (*Cryptobranchus alleganiensis alleganiensis*), a state endangered species and a federal species of concern. This long-lived, entirely aquatic salamander inhabits perennial streams with large flat rocks. In-water work in hellbender streams can reduce availability of large cover rocks and can destroy hellbender nests and/or kill adults and juveniles. The contribution of additional sediment to hellbender streams can smother large cover rocks and gravel/cobble substrate (used by juveniles), making them unsuitable for refuge and nesting. Projects that contribute to altered flow regimes (e.g., by increasing areas of impervious surfaces or modifying the

floodplain) can also adversely affect hellbender habitat. Due to the location, and that there is no in-water work proposed in a perennial stream of sufficient size to provide suitable habitat, this project is not likely to impact this species.

The project is within the range of the northern harrier (*Circus hudsonius*), a state endangered bird. This is a common migrant and winter species. Nesters are much rarer, although they occasionally breed in large marshes and grasslands. Harriers often nest in loose colonies. The female builds a nest out of sticks on the ground, often on top of a mound. Harriers hunt over grasslands. If this type of habitat will be impacted, construction should be avoided in this habitat during the species' nesting period of April 15 through July 31. If this habitat will not be impacted, this project is not likely to impact this species.

The project is within the range of the sandhill crane (*Antigone canadensis*), a state threatened species. Sandhill cranes are primarily a wetland-dependent species. On their wintering grounds, they will utilize agricultural fields; however, they roost in shallow, standing water or moist bottomlands. On breeding grounds they require a rather large tract of wet meadow, shallow marsh, or bog for nesting. If grassland, prairie, or wetland habitat will be impacted, construction should be avoided in this habitat during the species' nesting period of April 1 through August 31. If this habitat will not be impacted, this project is not likely to have an impact on this species.

Due to the potential of impacts to federally listed species, as well as to state listed species, we recommend that this project be coordinated with the US Fish & Wildlife Service.

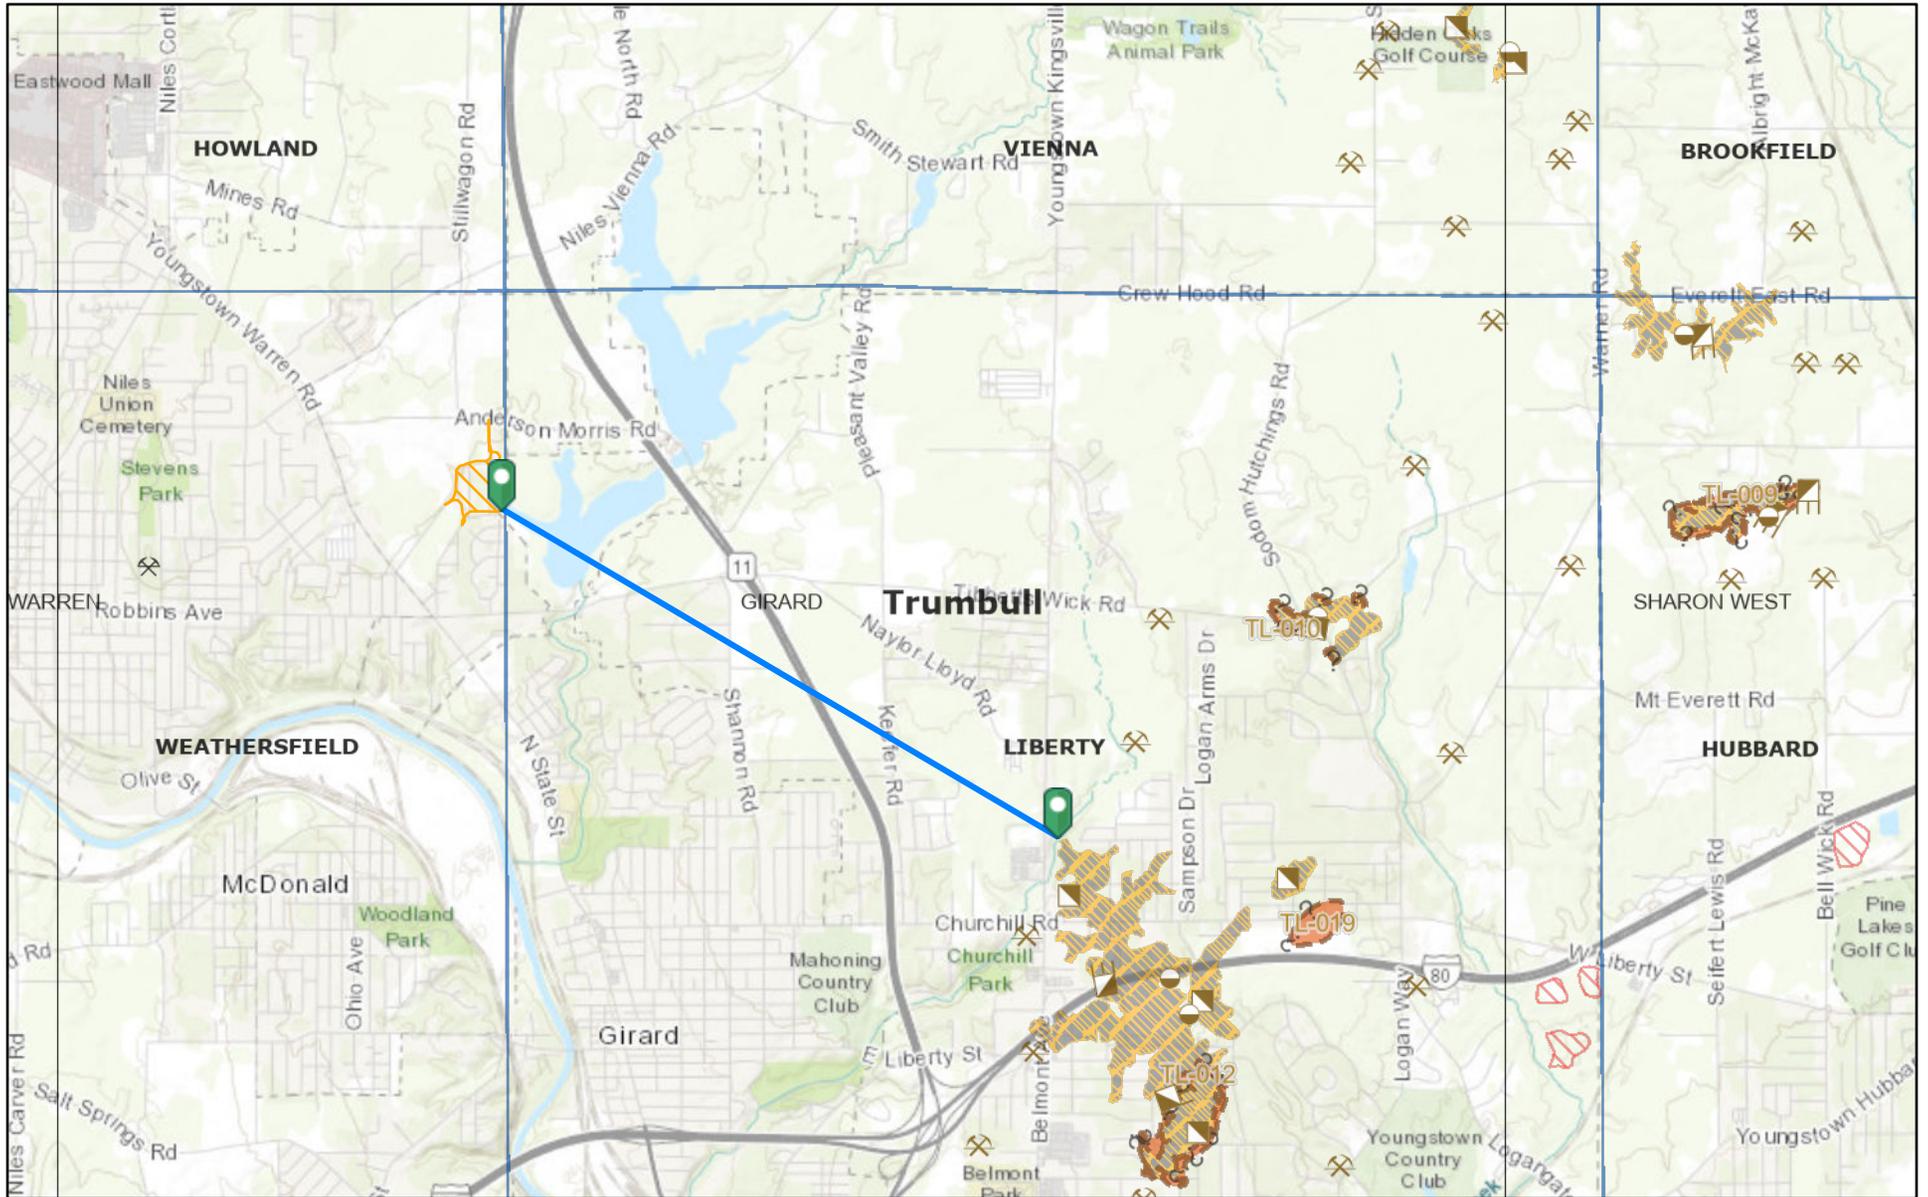

Water Resources: The Division of Water Resources has the following comment.

If the subject project is in a floodplain regulated by the Federal Emergency Management Agency (FEMA), the [local floodplain administrator](#) should be contacted concerning the possible need for any floodplain permits or approvals. The FEMA National Flood Hazard Layer (NHFL) Viewer [website](#) can be utilized to see if the project is in a FEMA regulated floodplain. If the project is not in a FEMA regulated floodplain, then no further action is required.

ODNR appreciates the opportunity to provide these comments. Please contact Mike Pettegrew (Environmental Services Administrator) at mike.pettegrew@dnr.ohio.gov if you have questions about these comments or need additional information.

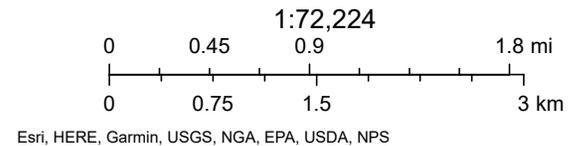

Expiration: *ODNR Environmental Reviews are typically valid for 2 years from the issuance date. If the scope of work, project area, construction limits, and/or anticipated impacts to natural resources have changed significantly from the original project submittal, then a new Environmental Review request should be submitted.*

Hello Andrew,

Per review of the desktop survey provided for the Crain Drive Sanitary Sewer Extension Project, the Ohio Division of Wildlife concurs with your assessment that no caves, cliffs, or mine openings occur in the project area. Therefore, the project is not likely to impact hibernating bats.

Should any reported conditions change before or during construction, please contact me for additional guidance.

Thank you,

Eileen Wyza, Ph.D.

Eileen,

I hope you're well!

Attached is a response I received from ODNR regarding the Crain Drive Sanitary Sewer project in Trumbull County, Ohio. I was instructed to perform a desktop assessment (Also attached).

The assessment illustrates that there are no Karst features in Trumbull County, and that there are no underground mines located within or near the project site.

Please let me know if you require additional information.

Respectfully,

Andrew Cvetkovich, Environmental Coordinator

Dear Mr. Johnson

Re: Trumbull County, OH - Environmental Review for the Crain Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Trumbull County, on behalf of the Ohio Department of Development and the United States Department of Housing and Urban Development, is in the process of performing an environmental review pursuant to Statutes, Executive Orders and Regulations set forth under 24 CFR Part 58 for the Community Development Block Grant (CDBG) Residential Public Infrastructure Grant (RPIG) Program funding the Crain Drive Sanitary Sewer Project Area in Weathersfield Township. The project is being constructed in accordance with the County's General Plan for Sewage.

We would like to request your review and comments related to any potential adverse or beneficial environmental impacts of the proposed Crain Drive Sanitary Sewer Project. Enclosed please find a location/service area map of the proposed sanitary sewer, a list of benefiting properties, and a map supporting the determination that the project does not impact on- or off-site wetlands.

Below is a description of the project scope for your reference. A copy of this letter and OEPA's response will be placed in the environmental review record for the proposed project.

Crain Drive Sanitary Sewer Project Area – Weathersfield Township:

The Crain Drive Sanitary Sewer Project will provide sanitary sewer to structures located on the following streets: Anderson Morris Road, Bianco Avenue, Carl Street, Crain Drive, Forest Avenue, Gardenland Street, Oakwood Avenue, Saint Francis Avenue, and Wabash Avenue. This project involves the construction of approximately, 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement. Sewer depths range from 10 to 22 feet to provide basement service for most of the structures. Service lateral wye connections will serve 63 residential structures. The Crain Drive Sanitary Sewer Project is comprised of low-and moderate-income households. The entire project area is located within Census Tract 9320 Block Group 1 reporting an LMI percentage of 53.20%. Trumbull County and the City of Girard have entered into a service agreement which permits Trumbull County to send the flow generated by this project to the City of Girard Waste Water Treatment Plant (WWTP).

Trumbull County will utilize \$520,000 of the \$750,000 RPIG for eligible costs associated with the construction of the mainline sewer. Trumbull County will utilize \$200,000 of the \$750,000 RPIG for eligible costs associated with LMI household connections, and the remaining \$30,000 of the \$750,000 RPIG

Tony Bernard, Commissioner • Rick Hernandez, Commissioner • Denny Malloy, Commissioner
David Barran • James Davies • Melissa Miller • Bob Moody
Rachel E. Nader • Phillip M. Pegg • Lisa Ramsey • Darlene St. George

will be utilized for eligible administrative costs to carry out the Crain Drive Sanitary Sewer Project through completion.

Trumbull County appreciates your review of this project.

If you have any questions, please contact me at andrew.cvetkovich@co.trumbull.oh.us or 330-675-6640.

Respectfully,
Andrew Cvetkovich

RE: Trumbull County Planning Commission
General Correspondence
Trumbull County
Surface Water Permit to Install

Subject: Environmental Review for the Crane Drive Sanitary Sewer Project Area-B-W-24-1CS-2

Dear Andrew Cvetkovich:

The Ohio EPA received your request dated May 13, 2025, to review and comment on the above referenced project. Ohio EPA concurs the project which will provide sanitary sewers to residential structures is beneficial to the community.

All sanitary sewer extension projects require a permit to install (PTI) prior to construction. If this project disturbs one or more acres of ground, then a construction stormwater discharge permit will also be required.

For projects involving construction or placement of fill in a stream or wetland, the applicant shall contact the appropriate district of U.S. Army Corps of Engineers for a determination regarding potential impacts to waters of the state as well as the requirements for obtaining, if necessary, certification. The applicant shall acquire a Section 404 permit and 401 water quality certification, if needed, before impacting any waters of the state as part of this project.

This letter is an official response from Ohio EPA that will be maintained as a public record. If you have any questions regarding this letter, please contact Patricia Vanah, Northeast Region Environmental Manager, at (330) 963-1113, or patricia.vanah@epa.ohio.gov.

Sincerely,

Mark S. Johnson, Jr.
Assistant Director
Ohio Environmental Protection Agency

Attachments: [image001.png](#)

Andrew,

Thanks for sending the Permit to Install (PTI) approval. It allowed me to quickly find information relative to this project. The PTI application covers the need for wetland and construction stormwater permits. According to the application, no wetlands will be impacted for this project hence no further action is needed, and a construction stormwater permit is required and was issued on October 4, 2024, 3GC15523*AG. Below is the link to the general stormwater permit, OHC000006:

[OHC000006.pdf](#)

Please do not hesitate to contact me if you have any more questions.

Mark,

Thanks for the prompt reply!

Patricia,

Attached is a Permit to Install we received on October 11, 2024. Regarding the Construction Stormwater discharge Permit, is that something that issued from your office? These improvements will be constructed within the road right-of-way along the edge of the road pavement. Assuming that the open-cut mainline and service laterals disturb a minimum width of 10' to 15' wide, we will disturb more than an acre ground.

Please let me know if this is something the OEPA issues or if I should contact local Soil and Water.

Respectfully,

NOTICE OF TRUMBULL COUNTY, OHIO
PY2024 COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAM
GENERAL PUBLIC HEARING NO. 1

The County of Trumbull intends to apply to the Ohio Department of Development for funding under the Community Development Block Grant (CDBG) Small Cities Program, a federally funded program administered by the state.

The County of Trumbull is eligible to apply for various competitive programs annually including but not limited to Economic Development, Community Housing Impact and Preservation, Residential Public Infrastructure and Critical Infrastructure Programs. The County may apply for funding through each of these programs according to the threshold limits defined for each grant in the PY2024 Consolidated Plan prepared by the Office of Community Development, Ohio Department of Development. Eligibility requirements and criteria for these programs are detailed in the State of Ohio's Consolidated Plan available on their website at <http://www.development.ohio.gov>.

The first of two (or more) public hearings will be held on Tuesday, February 13, 2024, at 6:00 P.M. at the Trumbull County Board of Developmental Disabilities, 45 North Rd., Niles, OH 44446. The CDBG programs can fund a broad range of activities including economic development projects, water supply, drainage and sanitary sewer improvements, demolition of unsafe structures, and critical infrastructure improvements. The activities must be designed to primarily benefit low- and moderate-income (LMI) persons or aid in the prevention or elimination of slums and blight.

Community stakeholders, interested entities, and the public are encouraged to attend the first General Public Hearing on Tuesday, February 13, 2024, at 6:00 P.M. to provide their input on the County's CDBG program.

#####

To be published one (1) time in the Legal Section of the Tribune Chronicle on Tuesday, February 6, 2024.

**PY24 Community Development Block Grant Program
General Public Hearing for Trumbull County
Trumbull County Board of Developmental Disabilities
45 North Road, Niles, Ohio 44446
Tuesday, February 13, 2024 at 6:00 p.m.**

Meeting Minutes

Meeting Attendance: No persons attended Public Hearing No. 1.

See Attached Agenda

The meeting began at 6:00 p.m. Nic Coggins, Assistant Director of the Planning Commission waited until 6:35 p.m. for residents to arrive. No person attended the General Public Hearing No. 1 for the PY24 Community Development Block Grant Program.

If any persons did attend Nic would have shared the following information and reviewed the agenda attached herein.

Provide a brief history of the CDBG program and discuss what constitutes meeting a National Objective. Discussion of eligible activities and past performance of Trumbull County. Discussion of the amounts and types of grant funds and programs available. The Residential Public Infrastructure Program, Community Housing Impact and Preservation Program, and Economic Development Public Infrastructure Program are few of the examples that are discussed in detail.

Residential Public Infrastructure Program

Goal: To create a safe and sanitary living environment for Ohio citizens, by providing safe and reliable drinking water and proper sanitary waste disposal.

Grant Ceiling: Maximum of \$750,000; maximum grant ceiling includes a public water or sanitary sewer project, on-site improvements and program administration costs. On-site improvements are capped at \$200,000. Up to 10% or \$30,000, whichever is less of can be used for general administration.

Counties must apply on behalf of unincorporated areas and villages that do not have a demonstrated capacity to operate a public water or wastewater system. Counties will be limited to two awards per program year. Cities and villages will be limited to one grant award per program year and these awards do not count towards the county's program year limit. Cities and villages funded under this program in PY 2023 will not be eligible for funding in PY 2024; however, counties funded in PY 2023 can apply on behalf of a different sub-unit of government within their jurisdiction.

Eligible Activities: The Residential Public Infrastructure Grant Program will only fund projects that provide water and/or sanitary sewer service to primarily residential users (minimum 60% of total users). Projects may fund a wastewater or drinking water project; an application that includes

both must have both water and sewer projects with their own eligible documented health hazard. Eligible on-site improvements include service laterals, septic tanks and well abandonment and CDBG-eligible related fees. Funding for water and/or sanitary sewer projects that benefit primarily commercial or industrial users are more appropriate for the Economic Development Program.

Economic Development Loan and Public Infrastructure Grant Program

Applicants must select either the Economic Development Loan Program or the Economic Development Public Infrastructure Grant Program. Applications must not request program funds for both activities.

For both the Loan and Grant Program

Goal: To create and retain permanent, private-sector job opportunities, principally for low- and moderate income persons, through expanding and retaining business and industry in Ohio communities.

Counties must apply on behalf of villages and townships; counties may also apply on behalf of cities within their jurisdiction.

Economic Development Loan Program

Ceiling: Maximum of \$500,000 for direct loans. A maximum of \$20,000, not to exceed 10% of the project request, can be used for general administration and implementation.

Eligible activities include providing financial assistance to private for-profit entities (through eligible units of general local government) to carry out economic development projects directly and primarily related to creating, expanding or retaining a business.

Economic Development Public Infrastructure Grant Program

Grant Ceiling: Maximum of \$500,000 for off-site infrastructure projects. A maximum of \$20,000, not to exceed 10% of the project request, can be used for general administration and implementation.

Eligible activities include providing financial assistance for public improvements directly and primarily related to creating, expanding or retaining a particular business.

In addition, for both the loan and grant program, job training is an eligible CDBG Economic Development Program activity. The state may provide applicants up to an additional \$50,000 in Economic Development Program funds to provide training for low and moderate-income individuals whose positions were created or retained by the recipient business.

Trumbull County shares that applications are accepted on a continuous basis, beginning July 1, 2024.

Community Housing Impact and Preservation (CHIP) Program

Goal: The Community Housing Impact and Preservation (CHIP) Program will partner with Ohio communities to preserve and improve the affordable housing stock for low-to moderate income Ohioans and strengthen neighborhoods through community collaboration.

Non-entitlement jurisdictions: (cities with a low-to-moderate income population at or above 25%, and all counties in the state) that are part of a participating jurisdiction consortium, as defined by the HOME Program regulations, with an approved CHIP Policy and Procedures Manual (eligible to receive OHTF and CDBG funds). Jurisdictions with an allocation of more than \$400,000 per year from HUD are eligible for a maximum CHIP Program award of \$250,000. The remaining jurisdictions must refer to “Grant Ceiling, Maximum Award - Option 2”-Single County: \$400,000.

A maximum of 12% of the total grant request may be budgeted for eligible administrative activities.

All housing activities completed with CHIP Program grant funds must be single-family homes, as defined by HUD as one (1) to four (4) units. Eligible activities include rehabilitation assistance, repair assistance, homeownership assistance, and tenant-based rental assistance.

Critical Infrastructure Grant (CIG) Program

Purpose: The Critical Infrastructure Grant (CIG) Program was created to assist communities with funding for high priority, single purpose, projects, such as roads, flood and drainage and other public facilities projects with high community-wide impact and that benefit primarily residential areas.

Eligible applicants are PY23 and PY24 Allocation Program counties and direct cities. Counties may apply on behalf of non-direct cities, villages, and unincorporated areas.

A maximum of \$30,000 or 10 percent of the total CDBG project cost, whichever is less, may be used for general administration, environmental review, audit and close-out.

No matching funds are required to apply for this grant program.

The meeting adjourned at 6:35 p.m.as no persons arrived from the public to attend the PY2024 CDBG Public Hearing No. 1.

Meeting Minutes

Meeting Attendance: No residents attended meeting. Staff went over the following information with the Township Trustees in attendance. See attached sign in sheet.

I. Introductions

- Zachary Steiner started the meeting with introductions.

II. Proposed Program Description

- The CDBG Residential Public Infrastructure Grant application will be submitted as soon as the state opens the application portal on OCEAN. The online application portal for the Ohio Department of Development. The date is still TBD.
- A request for release of funds will then be submitted once all environmental documentation is complete and the grant agreement is executed. No construction can begin and no award can be made for this project until we receive a release of funds from the state.
- The proposed sewer facility improvements included with this project involves the construction of approximately 9,816 linear feet of mainline sanitary sewer, service connections, and service lateral wye connections along with 30 manholes that will service 63 existing residential units & 1 commercial unit. The project will benefit households on the following streets: Crain Drive, Forest Avenue, Oakwood Street, Carl Street, Bianco Avenue, St. Francis Avenue, Wabash Avenue, and Gardenland Avenue (See attached Service Area & Location Map).

- The total estimated cost for this project is \$3,351,510. The expected funding sources are as followed:

CDBG RPIG	\$750,000
ARP Grant	\$350,000
OEPA/WPCLF 0% Loan	\$2,251,510

Total Project Cost	\$3,351,510
--------------------	-------------

- Estimated costs associated with the project include a one-time tap-in fee of \$1,800, sanitary lateral construction costs, necessary plumbing modifications, a monthly capital charge which is TBD and will be announced at the formal public hearing, and a monthly sanitary sewer bill.

III. Available Funds

- Funding will be available to assist low-and moderate- income households with connection to the sanitary sewer. Grant funds cannot be used to pay for the tap-in fee; however; low-and moderate-income households will be given the opportunity to pay the tap-in fee (\$1,800) in full at the completion of the project or pay the fee over a five-year period to the county at minimal cost.
- To qualify for financial assistance, you must meet HUD's low-income limits which are based off median family income. For a single person this is \$44,800, for a household with two people \$51,200, three people \$57,600, four people \$64,000 and so on. Once the formal public hearing is held, financial assistance applications will be mailed to all properties benefitted by the sanitary sewer.
- The Trumbull County Planning Commission will send out financial assistance applications to all benefitting owner occupied property owners upon notice of receiving grant funds. If you would like to start compiling necessary documents for your application, you will need:
 1. Most recent Tax Returns (2024) for all household members including all applicable schedules and attachments.
 2. Verifying documentation such as annual bank statements showing interest or dividend income, 1099 form showing annual social security income, annual statement or bank deposit showing pension income, W-2 form showing annual income from wages and your most recent pay stubs (one-month minimum), unemployment or child support award letter, welfare or food stamp benefits.
 3. You will also be required to direct your employer(s) to fill out and return a Job Income Verification form which will be enclosed in an application.
 4. Your real estate taxes must be current or enrolled in a tax repayment plan through the Trumbull County Treasurer's Office 330-675-2436.
 5. Please note: Only owner-occupied properties or those with a recorded land contract with the Trumbull County Recorder's Office are eligible for financial assistance.

IV. Open Discussion

There were no questions.

**NOTICE OF FINDING OF NO SIGNIFICANT IMPACT AND
NOTICE OF INTENT TO REQUEST A RELEASE OF FUNDS**

August 7, 2025

Mr. Rick Hernandez, President, Board of Trumbull County Commissioners
Trumbull County Administration Building, 160 High Street NW, 5th Floor, Warren, Ohio 44481
330-675-2451

To All Interested Agencies, Groups, and Individuals:

These notices shall satisfy two separate but related procedural requirements for activities to be undertaken by the Board of Trumbull County Commissioners.

REQUEST FOR RELEASE OF FUNDS

On or about, but not before, August 25, 2025, the Board of Trumbull County Commissioners will submit a request to the State of Ohio for the release of Federal funds under Section 104 (g) of Title I of the Housing and Community Development Act of 1974, as amended; Section 288 of Title II of the Cranston Gonzales National Affordable Housing Act (NAHA), as amended; and/or Title IV of the Stewart B. McKinney Homeless Assistance Act, as amended; to be used for the following project(s):

Crain Drive Sanitary Sewer Project; Mainline Construction, LMI Household Connections & Administration, PY 2024 Community Development Block Grant Residential Public Infrastructure Grant Construction of approximately 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/laterals. The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement and 63 service lateral wye connections for residential structures. Approximately 25 LMI sanitary lateral household connections for income-qualified, owner-occupants, professional services, construction administration and inspections; Multi-Year Project, Census Tract 9320 Block Group 2, Weathersfield Township, Trumbull County, Ohio; Total Project Cost \$3,351,510.

FINDING OF NO SIGNIFICANT IMPACT

The Board of Trumbull County Commissioners has determined that the project will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under the National Environmental Policy Act of 1969 (NEPA) is not required. Additional project information is contained in the Environmental Review Record (ERR) which is available for review on the Board of Trumbull County Commissioners website at <https://www.co.trumbull.oh.us/Commissioners/Bid-Opportunities> under Public Hearings/Notices and on file at the Trumbull County Planning Commission, 185 East Market Street, 2nd Floor, Suite A, Warren, Ohio 44481 and may be examined or copied weekdays M-F between 8 A.M. and 4 P.M., except for legal holidays. The ERR may also be provided upon request electronically via email. Please submit your request by U.S. mail to Andrew Cvetkovich, Trumbull County Planning Commission, 185 East Market Street, 2nd Floor, Suite A, Warren, Ohio 44481 or by email to Andrew.Cvetkovich@co.trumbull.oh.us

PUBLIC COMMENTS

Any individual, group, or agency may submit written comments on the ERR to the Board of Trumbull County Commissioners by U.S. mail or email at the addresses above. All comments received before Monday, August 25, 2025, will be considered by the Board of Trumbull County Commissioners prior to authorizing submission of a request for release of funds. Comments should specify which Notice they are addressing.

ENVIRONMENTAL CERTIFICATION

The Board of Trumbull County Commissioners certifies to the State of Ohio that Rick Hernandez in his capacity as President, Board of Trumbull County Commissioners consents to accept the jurisdiction of the Federal Courts if an action is brought to enforce responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. The State of Ohio's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities and allows the Board of Trumbull County Commissioners to use Program funds.

OBJECTIONS TO RELEASE OF FUNDS

The State of Ohio will accept objections to its release of funds and the Board of Trumbull County Commissioners certification for a period of fifteen days following the anticipated submission date or its actual receipt of the request (whichever is later) only if they are on one of the following bases: (a) the certification was not executed by the Certifying Officer of the Board of Trumbull County Commissioners; (b) the Board of Trumbull County Commissioners has omitted a step or failed to make a decision or finding required by HUD regulations at 24 CFR part 58; (c) the grant recipient or other participants in the development process have committed funds, incurred costs or undertaken activities not authorized by 24 CFR Part 58 before approval of a release of funds by the State of Ohio; or (d) another Federal agency acting pursuant to 40 CFR Part 1504 has submitted a written finding that the project is unsatisfactory from the standpoint of environmental quality. Objections must be prepared and submitted in accordance with the required procedures (24 CFR Part 58, Sec. 58.76) and shall be addressed to Ohio Department of Development, Office of Community Development at OCD@development.ohio.gov. Potential objectors should contact the State of Ohio to verify the actual last day of the objection period.

Mr. Rick Hernandez, President, Board of Trumbull County Commissioners

**State of Ohio Department of Development

Administering Agent name and Address:</p> <p>Andrew Cvetkovich, Environmental Coordinator Trumbull County Planning Commission 185 E Market Street, 2nd Floor, Suite A Warren, Ohio 44481</p> <p>Phone: 330-675-6640 Email: Andrew.Cvetkovich@co.trumbull.oh.us</p>	<p>Submit Form and Public Notice(s) to the Ohio Department of Development Office of Community Development at ocd@development.ohio.gov.</p>
---	---	--

Part 2: Request for Release of Funds

The Responsible Entity requests the release of funds and removal of environmental grant conditions governing the use of the assistance for the following Activity(ies)/Project(s):

Grant Agreement No.	Name of Project and Activity <i>(as listed in Attachment A of the Grant Agreement)</i>	Activity No.	List the Amount of Federal Funds Budgeted for Each Activity	List the Activity Location, as Designated in the Grant Agreement	Describe the Entire (Aggregated) Project	Level of Environmental Finding: CE (Categorical Exclusion) EA (Environmental Assessment)
B-W-24-1CS-2	Household Connections	1	\$200,000	Crain Drive Sanitary Sewer Project Area; Census Tract 9320 Block Group 1, Weathersfield Township	Construction of sanitary lateral, plumbing modifications, etc. in order to connect an estimated 25 LMI owner-occupants to the newly constructed sanitary sewer.	EA
B-W-24-1CS-2	Sewer Facility Improvements	2	\$520,000	Crain Drive Sanitary Sewer Project Area; Census Tract 9320 Block Group 1, Weathersfield Township	Construction of approximately 645 linear feet of 18" sanitary sewer, 963 feet of 15" sanitary sewer, 1,003 linear feet of 12" sanitary sewer, 3,985 linear feet of 8" sanitary sewer, and 1,131 linear feet of 6" sanitary service connections/lateralsRequired administrative duties	EA (cont.) . The project also involves 30 pre-cast manholes and 2,089 linear feet of storm sewer removal/replacement and 63 service lateral wye connections for residential structures.
B-W-24-1CS-2	Administration	3	\$30,000	Same as above	Required administrative duties	EXEMPT

Part 3: Environmental Certification

With reference to the Activity(ies)/Project(s) identified on the reverse side of this form, I, the undersigned certifying officer of the responsible entity, CERTIFY THAT: (Note: Items 4 and 5 below require additional action.)

1. The responsible entity has fully carried out its responsibilities for environmental review, decision-making, and action pertaining to the project(s) listed herein.
2. The responsible entity has assumed responsibility for and complied with and will continue to comply with, the National Environmental Policy Act of 1969, as amended, and the environmental procedures, permit requirements and statutory obligations of the laws cited in 24 CFR 58.5; and also agrees to comply with the authorities in 24 CFR 58.6 and applicable State and local laws.
3. The responsible entity has assumed responsibility for and complied with and will continue to comply with Section 106 of the National Historic Preservation Act, and its implementing regulations 36 CFR 800.
4. After considering the type and degree of environmental effects identified by the environmental review(s) completed for the proposed project(s) described herein, I have found that the proposal **(CHECK ONE)** · DID DID NOT require the preparation and dissemination of an ENVIRONMENTAL IMPACT STATEMENT.
5. The responsible entity has, prior to submitting this request for release of funds and certification, published, in the manner prescribed by 24 CFR 58.43, a notice to the public in accordance with 24 CFR 58.70 and as evidenced by the attached copy. **(ATTACH COPY(IES) OF NOTICE(S))**
6. The dates for all statutory and regulatory time periods for review, comment, or other action are in compliance with the procedures and requirements of 24 CFR Part 58. The following provides a summary of critical dates:

Categorically Excluded Projects (CE)	Notice of Intent to Request Release of Funds (NOI/RROF) Publication Date	Last Date of Local Comment Period	Date Certification Signed and Submitted	Estimated Last Date of State Objection Period	Type of Other Notices (e.g., floodplain/wetland) and Date Published

Environmental Assessment Projects (EA)	Combined Notice (FONSI & NOI/RROF) Publication Date	Last Date of Local Comment Period	Date Certification Signed and Submitted	Estimated Last Date of State Objection Period	Type of Other Notices (e.g., floodplain/wetland) and Date Published
	August 7, 2025	August 22, 2025	August 25, 2025	September 9, 2025	None

7. I am authorized to and do consent to assume the status of Federal official under the National Environmental Policy Act of 1969 and each provision of law designated in the 24 CFR 58.5 list of NEPA-related authorities insofar as the provisions of these laws apply to the HUD responsibilities for environmental review, decision-making and action that have been assumed by the responsible entity.
8. I am authorized to and do accept, on behalf of the responsible entity personally, the jurisdiction of the Federal courts for the enforcement of all these responsibilities, in my capacity as certifying officer of the responsible entity.

Name of Certifying Officer of the Responsible Entity	Signature	Title	Date
Rick Hernandez		President, Board of Trumbull County Commissioners	8/25/2025

WARNING: Section 1001 of Title 18 of the United States Code shall apply to this certification.
